

Inspection, Maintenance & Repair Agreement

for APFenergyFilter™

Fine dust filters for biomass combustion systems in industry, commerce and district heating

LIGHT

Inspection and maintenance

MEDIUM

including troubleshooting & freight costs

LARGE

in full, including spare parts

The APF Service Agreement ensures the reliable operation of your APFenergyFilter™; predictable, cost-effective, and directly through specialists from the original manufacturer. Choose the module that suits your needs.

Three modules in detail

LIGHT: Annual inspection with documentation

Ideal for operators who want a professional inspection by the original manufacturer and who may require troubleshooting and spare parts separately.

Included: Cleaning, functional check, staff training, test report.

Additional charges may apply: Troubleshooting, travel expenses, replacement and wear parts.

MEDIUM: Planning security through all-round service

For operators who want to include troubleshooting and travel costs as a fixed, calculable service in their contract, in addition to the annual inspection.

Included: All LIGHT services + troubleshooting (business hours) + travel expenses. Spare and wear parts charged separately.

LARGE: Maximum coverage; all inclusive

The most comprehensive solution for systems with high availability requirements or in continuous operation.

Included: All MEDIUM services + spare and wear parts fully included.

Performance comparison at a glance

Performance	LIGHT	MEDIUM	LARGE
INSPECTION & MAINTENANCE			
Inspection & maintenance once a year according to individual inspection/maintenance logbook	✓	✓	✓
Cleaning the filter	✓	✓	✓
Functional check of the filter	✓	✓	✓
Instructions for operating personnel	✓	✓	✓
TROUBLESHOOTING			
Rectification of malfunctions (APF business hours)	according to effort	✓	✓
TRAVEL COSTS			
Travel costs including service vehicle & tools	according to effort	✓	✓
SPARE & WEAR PARTS			
Supply of spare and wear parts	according to effort	according to effort	✓

✓ = included · according to effort = separately billable · For multiple filters at the same location, travel costs are only charged once.

Your advantages

**Predictable operating costs**

Fixed annual agreement instead of unexpected repair bills

**Early detection of defects**

Wear and tear is detected before it leads to unplanned failure.

**Fewer business interruptions**

Inspection outside the heating season; the business continues to operate.

**Longer plant lifespan**

Professional maintenance and service by manufacturer specialists

**No training required**

Exclusively APF's own specialist personnel with complete plant knowledge

**Written documentation**

Inspection report after each inspection; basis for forward-looking investment planning

**Investment security**

Condition analysis enables better planning of future measures

**Flexible contract term**

Contract start date possible at any time; regardless of year of construction and operating hours

**Cancellable at any time**

Termination is possible at any time with 3 months' notice to the end of the month.
