Your area of responsibility

- Responsibility for **purchasing and operational order processing**
- **Work preparation** for our **production**
- **Organization and management** of our **warehouse**
- Processing of **orders, goods movements** and documentation in the **ERP system**
- Further development and optimization of warehouse, logistics and ERP processes
- Collaboration in the **implementation of new ERP functions**, interfaces and digital workflows

Your profile

- Successfully completed **technical or commercial training**
- High **affinity for technology and IT**
- Ideally experience in the areas of **warehousing, purchasing, work preparation or logistics**
- **Confident handling of ERP systems** & a good understanding of operational processes (interaction between purchasing, warehouse and production)
- Structured, **careful** and independent **way of working**
- Enjoyment of further developing existing workflows and ERP processes
- Understanding of digital interfaces and automated processes is an advantage

We offer

- **Comprehensive training** and direct cooperation with experienced colleagues
- **Varied tasks** with a lot of personal responsibility
- **Modern technologies and space for your ideas:** Innovation is created in dialogue with us
- **Individual training courses** to promote professional development
- Personal working environment with short decision-making paths, cooperation at eye level and mutual support
- Opportunities for professional development. We support you if you want to develop further.

We look forward to receiving your application! [Apply now](#)
